

Basic Life Support in Care (Standard 12 Care Certificate) - E-Learning

Course Aim

The course aims to help delegates understand what to do if an adult, a child or an infant is choking, what DRABC stands for and how it allows them to perform a primary survey. The course also aims to provide the knowledge delegates are required to know as part of Standard 12 of the Care Certificate.

Available in over 35 languages

Our courses are machine translated* into a variety of popular International languages, so regardless of location or language preference, we've got you covered. Our machine translated content includes the translation of course transcripts and test questions.

**Content which is not English may be machine translated and is for assistive purposes only. We cannot guarantee the accuracy of translations.*

Agenda

The course modules cover:

- Basic Life Support for Adults
- Treating a Choking Child
- Obstructed Airways - Infants
- Training and Record Keeping

Certification

Delegates will receive a HSS printable certificate in Basic Life Support in Care upon completion of the course.

This course is approved and accredited by Skills for Care.

Who Should Attend?

Covering Standard 12 of the Care Certificate, this e-learning training course educates delegates on the administration of basic life support. It is broken down into 3 elements, initial assessment (primary survey), airway maintenance and CPR.

Course Duration

This is a 30 minute course.
