

HSS Confined Space Awareness

Course Aim

This is an introductory course designed to provide a foundational understanding of confined spaces, including:

- What is considered a confined space
- Common confined space hazards and potential risks
- Safe systems of work and control measures
- The importance of risk assessments and permit systems
- Appropriate training and competency requirements for confined space work

Agenda

- Awareness of working in confined spaces
- Understanding of the risks involved with confined space entries
- Equipment and Breathing Apparatus requirements
- Confined space regulations
- Common hazards and the necessary precautions
- Safe systems of work
- Emergency arrangements

Who Should Attend?

Aimed at anyone who may require a knowledge of confined spaces as part of their role.

It is particularly suitable for:

- Site managers / supervisors / agents
- H&S managers and advisors
- Construction and project managers
- Engineers and contract managers
- Facilities management staff and building supervisors
- Maintenance supervisors and technicians
- Utilities, water, and infrastructure operatives

Certification

Assessment is completed through a short multiple-choice question paper. Delegates who successfully complete the course will be issued with a digital certificate issued by HSS Training. This is valid for 3 years.

Course Duration

This is a 1 day course
