

Safety Health and Environmental Awareness (SHEA) WATER

Course Aim

To provide delegates with the knowledge and understanding required to work safely within the Water industry, including workplace procedures, hazards, process operations and health, safety and environmental responsibilities.

This course is delivered on behalf of HSS Training by one of our trusted third-party suppliers, who are a registered EUSR-approved provider.

Who Should Attend?

Our SHEA Water scheme is designed for all persons who require access to operational sites within the water industry, both permanent and temporary, including all levels of operatives, supervisors and management.

Certification

On successful completion of the course and assessment, delegates receive EUSR SHEA Water registration, valid for 3 years.

SHEA Water is a CSCS Partner scheme, and successful delegates receive a CSCS-certified card for utilities work.

Agenda

Six core modules and two water-industry specific

- **Module 1:** Understanding our workplace responsibilities
Underpinning legal frameworks, definitions and their application in the workplace, including the responsibilities of the individual and employer.
- Module 2:** Understanding the effects of our work on the environment
Key environmental considerations in the workplace and their impact on the sustainability of the environment.
- Module 3:** Identifying and controlling risks
Identifying and controlling risks and hazards and understanding the role of positive and proactive health and safety behaviours.
- Module 4:** Common hazards in the workplace
Identifying common physical hazards and minimising their impact in the workplace.

Safety Health and Environmental Awareness (SHEA) WATER

Agenda continued

- **Module 5:** Occupational health hazards
Understanding occupational health hazards and how to identify, mitigate and minimise them in the workplace.

Module 6: Responding to emergencies
Understanding emergency response behaviours, reporting, inspection and enforcement of health and safety in the workplace.

Module 7: Sewerage network and process operations
Understanding the types of hazards associated with sewerage network and process operations environments.

Module 8: Highway working and excavations
Understanding the processes and procedures required to work in the highway and create a safe working environment through safe systems of work, including what to do in an emergency.
